

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS ServiceNow learners and administrators building or testing ACL-based access. Test user: EEE User.	6. CUSTOMER CONSTRAINTS CC Access must be enforced server-side. Users have different roles, and records contain Branch values that control visibility.	5. AVAILABLE SOLUTIONS AS Record ACLs with role requirements and data conditions. Script-controlled access and impersonation validate the result.	Explore AS, differentiate
Focus on J&P, tap into BE, understand RC	2. JOBS-TO-BE-DONE / PROBLEMS J&P Restrict READ access to records that meet the required condition. Allow EEE users to view EEE records while preventing unauthorized access.	9. PROBLEM ROOT CAUSE RC Role membership alone does not identify which records a user may view. The decision must consider both the user and the record.	7. BEHAVIOUR BE Create the EEE User and assign role bb1. Create ECE, EEE and CSE records. Impersonate users and compare access with Admin.	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	3. TRIGGERS TR A user requests a record or list. The ACL evaluates the request and the record's Branch value.	10. YOUR SOLUTION SL Table: u_institution_details. Fields: Student Roll Number, Student Name, Faculty Name, Branch, Email, Phone Number, Description. READ ACL: record / read / active / Advanced; role bb1; Branch = EEE. Admin retains full access.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE Navigate to User Administration, System Definition and System Security. Create the user, roles, table and ACL, then open the table list.	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM Before: uncertainty about visible records. After: access is clearly allowed or denied. EEE User: EEE records. Unauthorized user: denied. Admin: full access.		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 Create ECE, EEE and CSE sample records. Impersonate EEE User, an unauthorized user and Admin; compare READ results.
